

Rahul Rahul

Cloud Data and AI Transformation Leader

rahul@rahulrahul.com.au | +61 432140552 | rahulrahul.com.au

Profile Summary

Entrepreneur and Senior cloud and data transformation leader with over 25 years of experience across banking, consulting, startups and enterprise technologies. I help organisations modernise complex environments, strengthen operational resilience, and build intelligent, AI-ready platforms. My approach combines strategic architecture leadership with hands-on delivery to drive measurable business outcomes.

Core Competencies

Cloud Modernisation | AI Readiness & Automation | Data Platform Strategy | Technology Governance | Enterprise Architecture | Stakeholder Engagement | Transformation Leadership

Career Snapshot

National Australia Bank (NAB) | Senior Cloud Architect – Multicloud | Since 2021

Shaped cloud, data, and AI enablement across platforms; guided architecture decisions for migration and automation; accelerated AI readiness.

MR Kloud Foundation Ltd | Co-Founder and Chief Architect | Since 2021

Helped shape a better environment through circular economy with reuse, repurpose, recycle.

Metro Trains Melbourne | Cloud Architect | 2019 – 2020

Modernised core operational systems, improving platform uptime to 99.99% and reducing operational costs by 50%.

Contino | Principal Consultant | 2018 – 2019

Advised enterprise clients on DevOps and cloud transformation strategies; uplifted architecture maturity for regulated sectors.

Amazon Web Services (AWS) | Senior Technical Account Manager | 2015 – 2018

Led multi-domain migration strategy for Fortune 500 clients; enabled enterprise cloud adoption at scale.

Earlier Experience: The Good Guys, Eastern Health, Tech Consulting | 2001-2014

Delivered architecture solutions for large financial and public-sector clients, spanning infrastructure, integration, and digital transformation.

Select Career Highlights

- Reduced \$85M in technology debt through automation, optimisation and modernisation.
- Secured critical 5 PB+ of customers and enterprise dataset.
- Standardised cloud architecture patterns adopted bank wide.
- Enabled AI/ML readiness by defining governance and observability frameworks.
- Delivered 250+ architecture artefacts, improving design traceability and governance.

Detailed Experience

National Australia Bank (NAB)

- As Senior Cloud Architect – Multicloud, I led enterprise cloud enablement and data strategy initiatives across critical workloads.
- Worked closely with AI and platform teams to design scalable automation frameworks, reusable patterns, and governance models that uplifted platform maturity and accelerated AI adoption.

Metro Trains Melbourne

- Delivered large-scale infrastructure modernisation projects, improving reliability, uptime, and cost efficiency.
- Collaborated with vendors and internal operations teams to embed observability, security, and disaster recovery capabilities across critical systems.

Contino

- Provided architectural consulting and advisory to enterprise clients during major DevOps and cloud transformation programs.
- Designed target-state architectures and operational readiness roadmaps for highly regulated industries, including financial services.

Amazon Web Services (AWS)

- Served as Senior Technical Account Manager supporting enterprise clients across banking and government sectors.
- Enabled cloud migrations and performance optimisation of mission-critical workloads while ensuring compliance and scalability.

Earlier Experience

- Held senior consultant and delivery roles at Wipro, HCL Tech, and retail, healthcare firms.
- Focused on infrastructure modernisation, integration, and digital transformation for financial and public-sector organisations.

Education & Certifications

- Master of Computer Applications (MCA)
- AWS Certified Solutions Architect – Professional
- Microsoft Certified: Azure Solutions Architect Expert
- FINSIA Certified | APRA CPS230 and CPS234 Compliance Knowledge
